- 12. (Currently Amended) A system for forming an injection molded plastic part in a mold comprising:
 - a mold, said mold having a part-forming mold cavity therein;
- sealing members for sealing said mold cavity and preventing gas leakage therefrom;
- a first gas source for supplying a gas into the mold cavity to pre-pressurize the mold cavity to a first pre-determined value;
- an infinitely adjustable pressure controlled a gas pressure valve for removing said gas from the mold cavity as desired;
- a gas control mechanism for maintaining the gas pressure in the mold cavity at a second pre-determined value;
 - a source for injecting molten plastic material into the mold cavity;
- a gas pin assembly for supplying gas into the plastic material in the mold cavity; and

a second gas source for supplying gas to said gas pin assembly.

- 13. (Original) The system as recited in claim 12 further comprising: at least one ejector pin assembly for ejecting the completed plastic part from the mold cavity.
- 14. (Original) The system as recited in claim 12 wherein said first and second gas source are the same source.
- 15. (Original) The system as recited in claim 12 wherein said gas control mechanism comprises an infinitely adjustable gas control valve.
- 16. (Previously Presented) The system as recited in claim 12 further comprising a pressure switch for controlling the operation of said valve.
